DATASHEET - BZME1-4-A100-BT

Circuit-breaker, 4 p, 100A, box terminal

BZME1-4-A100-BT 112574 Alternate Catalog BZME1-4-A100-BT

Design verification as per IEC/EN 61439

Part no.

No.

Catalog No.

Technical data for design verification			
Rated operational current for specified heat dissipation	I _n	А	100
Equipment heat dissipation, current-dependent	P _{vid}	W	31.1
	r vid	vv	51.1
IEC/EN 61439 design verification			
10.2 Strength of materials and parts			
10.2.2 Corrosion resistance			Meets the product standard's requirements.
10.2.3.1 Verification of thermal stability of enclosures			Meets the product standard's requirements.
10.2.3.2 Verification of resistance of insulating materials to normal heat			Meets the product standard's requirements.
10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects			Meets the product standard's requirements.
10.2.4 Resistance to ultra-violet (UV) radiation			Meets the product standard's requirements.
10.2.5 Lifting			Does not apply, since the entire switchgear needs to be evaluated.
10.2.6 Mechanical impact			Does not apply, since the entire switchgear needs to be evaluated.
10.2.7 Inscriptions			Meets the product standard's requirements.
10.3 Degree of protection of ASSEMBLIES			Does not apply, since the entire switchgear needs to be evaluated.
10.4 Clearances and creepage distances			Meets the product standard's requirements.
10.5 Protection against electric shock			Does not apply, since the entire switchgear needs to be evaluated.
10.6 Incorporation of switching devices and components			Does not apply, since the entire switchgear needs to be evaluated.
10.7 Internal electrical circuits and connections			Is the panel builder's responsibility.
10.8 Connections for external conductors			Is the panel builder's responsibility.
10.9 Insulation properties			
10.9.2 Power-frequency electric strength			Is the panel builder's responsibility.
10.9.3 Impulse withstand voltage			Is the panel builder's responsibility.
10.9.4 Testing of enclosures made of insulating material			Is the panel builder's responsibility.
10.10 Temperature rise			The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices.
10.11 Short-circuit rating			Is the panel builder's responsibility. The specifications for the switchgear must be observed.
10.12 Electromagnetic compatibility			Is the panel builder's responsibility. The specifications for the switchgear must be observed.
10.13 Mechanical function			The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.

Technical data ETIM 7.0

Low-voltage industrial components (EG000017) / Power circuit-breaker for trafo/generator/installation protection (EC000228)

Electric engineering, automation, process control engineering / Low-voltage switch technology / Circuit breaker (LV < 1 kV) / Circuit breaker for power transformer, generator and system protection (ecl@ss10.0.1-27-37-04-09 [AJZ716013])

Rated voltage V 45-415 Rated voltage KA 18 Overload release current setting A 0 Adjustment range short-term delayed short-circuit release A 0 Adjustment range undelayed short-circuit release A 800 - 1200 Integrated earth fault protection Mo No Type of electrical connection of main circuit E Fame clamp Device construction E Built-in device fixed built-in technique Suitable for DIN rail (top hat rail) mounting E No			
Rated short-circuit breaking capacity lcu at 400 V, 50 Hz kA 18 Overload release current setting A 0 Adjustment range short-term delayed short-circuit release A 0 Adjustment range undelayed short-circuit release A 0 Integrated earth fault protection A 800 - 1200 Type of electrical connection of main circuit Frame clamp Device construction Built-in device fixed built-in technique Suitable for DIN rail (top hat rail) mounting Mo	Rated permanent current lu	А	100

Adjustment range short-term delayed short-circuit release A 0 Adjustment range undelayed short-circuit release A 800 - 1200 Integrated earth fault protection Mo Frame clamp Device construction Built-in device fixed built-in technique Suitable for DIN rail (top hat rail) mounting Image: Construction of main circuit of mounting of mounti	Rated short-circuit breaking capacity Icu at 400 V, 50 Hz	kA	18
Adjustment range undelayed short-circuit release A 800 - 1200 Integrated earth fault protection No No Type of electrical connection of main circuit Frame clamp Device construction Built-in device fixed built-in technique Suitable for DIN rail (top hat rail) mounting No	Overload release current setting	А	0 - 0
Integrated earth fault protection Type of electrical connection of main circuit Device construction Suitable for DIN rail (top hat rail) mounting	Adjustment range short-term delayed short-circuit release	А	0 - 0
Type of electrical connection of main circuit Main Frame clamp Device construction Built-in device fixed built-in technique Suitable for DIN rail (top hat rail) mounting No	Adjustment range undelayed short-circuit release	А	800 - 1200
Device construction Ball Built-in device fixed built-in technique Suitable for DIN rail (top hat rail) mounting No	Integrated earth fault protection		No
Suitable for DIN rail (top hat rail) mounting	Type of electrical connection of main circuit		Frame clamp
	Device construction		Built-in device fixed built-in technique
DIN rail (top hat rail) mounting optional Yes	Suitable for DIN rail (top hat rail) mounting		No
	DIN rail (top hat rail) mounting optional		Yes

Motor drive integrated Motor drive optional	No No
Complete device with protection unit	Yes
Type of control element	Rocker lever
Position of connection for main current circuit	Front side
Number of poles	4
With under voltage release	No
With switched-off indicator	No
Number of auxiliary contacts as change-over contact	0
Number of auxiliary contacts as normally open contact	0
Number of auxiliary contacts as normally closed contact	0
