DATASHEET - NZMH3-AE250-T-S1

Circuit-breaker, 3p, 250A, 1000 V

Part no. NZMH3-AE250-T-S1 Catalog No. 119719

Similar to illustration

Design verification as per IEC/EN 61439

IEC/EN 61439 design verification	
10.2 Strength of materials and parts	
10.2.2 Corrosion resistance	Meets the product standard's requirements.
10.2.3.1 Verification of thermal stability of enclosures	Meets the product standard's requirements.
10.2.3.2 Verification of resistance of insulating materials to normal heat	Meets the product standard's requirements.
$10.2.3.3\ Verification\ of\ resistance\ of\ insulating\ materials\ to\ abnormal\ heat\ and\ fire\ due\ to\ internal\ electric\ effects$	Meets the product standard's requirements.
10.2.4 Resistance to ultra-violet (UV) radiation	Meets the product standard's requirements.
10.2.5 Lifting	Does not apply, since the entire switchgear needs to be evaluated.
10.2.6 Mechanical impact	Does not apply, since the entire switchgear needs to be evaluated.
10.2.7 Inscriptions	Meets the product standard's requirements.
10.3 Degree of protection of ASSEMBLIES	Does not apply, since the entire switchgear needs to be evaluated.
10.4 Clearances and creepage distances	Meets the product standard's requirements.
10.5 Protection against electric shock	Does not apply, since the entire switchgear needs to be evaluated.
10.6 Incorporation of switching devices and components	Does not apply, since the entire switchgear needs to be evaluated.
10.7 Internal electrical circuits and connections	Is the panel builder's responsibility.
10.8 Connections for external conductors	Is the panel builder's responsibility.
10.9 Insulation properties	
10.9.2 Power-frequency electric strength	Is the panel builder's responsibility.
10.9.3 Impulse withstand voltage	Is the panel builder's responsibility.
10.9.4 Testing of enclosures made of insulating material	Is the panel builder's responsibility.
10.10 Temperature rise	The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices.
10.11 Short-circuit rating	Is the panel builder's responsibility. The specifications for the switchgear must be observed.
10.12 Electromagnetic compatibility	Is the panel builder's responsibility. The specifications for the switchgear must be observed.
10.13 Mechanical function	The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.

Technical data ETIM 7.0

Low-voltage industrial components (EG000017) / Power circuit-breaker for trafo/generator/installation protection (EC000228)

Electric engineering, automation, process control engineering / Low-voltage switch technology / Circuit breaker (LV < 1 kV) / Circuit breaker for power transformer, generator and system protection (eci@ss10.0 1-27-37-04-09 [A.17716013])

Rated voltage Rated short-circuit breaking capacity Icu at 400 V, 50 Hz kA 100 Overload release current setting A 125 - 250 Adjustment range short-term delayed short-circuit release A 0 - 0 Adjustment range undelayed short-circuit release A 125 - 250 Altegrated earth fault protection Type of electrical connection of main circuit Device construction V 1000 - 1000 A 100 100 100 100 100 100	protection (eci@ss10.0.1-2/-3/-04-09 [AJZ/16013])		
Rated short-circuit breaking capacity Icu at 400 V, 50 Hz kA 100 Overload release current setting A 125 - 250 Adjustment range short-term delayed short-circuit release A 0 - 0 Adjustment range undelayed short-circuit release A 125 - 250 Integrated earth fault protection Type of electrical connection of main circuit Device construction kA 100 Ves Screw connection Built-in device fixed built-in technique	Rated permanent current lu	Α	250
Overload release current setting A 125 - 250 Adjustment range short-term delayed short-circuit release A 0 - 0 Adjustment range undelayed short-circuit release A 125 - 250 Integrated earth fault protection Type of electrical connection of main circuit Device construction A 125 - 250 Yes Screw connection Built-in device fixed built-in technique	Rated voltage	V	1000 - 1000
Adjustment range short-term delayed short-circuit release A 0 - 0 Adjustment range undelayed short-circuit release A 125 - 250 Integrated earth fault protection Type of electrical connection of main circuit Device construction A 125 - 250 Yes Screw connection Built-in device fixed built-in technique	Rated short-circuit breaking capacity Icu at 400 V, 50 Hz	kA	100
Adjustment range undelayed short-circuit release A 125 - 250 Integrated earth fault protection Type of electrical connection of main circuit Device construction A 125 - 250 Yes Screw connection Built-in device fixed built-in technique	Overload release current setting	Α	125 - 250
Integrated earth fault protection Yes Type of electrical connection of main circuit Screw connection Built-in device fixed built-in technique	Adjustment range short-term delayed short-circuit release	Α	0 - 0
Type of electrical connection of main circuit Device construction Screw connection Built-in device fixed built-in technique	Adjustment range undelayed short-circuit release	Α	125 - 250
Device construction Built-in device fixed built-in technique	Integrated earth fault protection		Yes
	Type of electrical connection of main circuit		Screw connection
Suitable for DIN rail (top hat rail) mounting	Device construction		Built-in device fixed built-in technique
	Suitable for DIN rail (top hat rail) mounting		No
DIN rail (top hat rail) mounting optional	DIN rail (top hat rail) mounting optional		No
