Motor Protection Solutions

Protecting Your Investments

Motor Protection Solutions

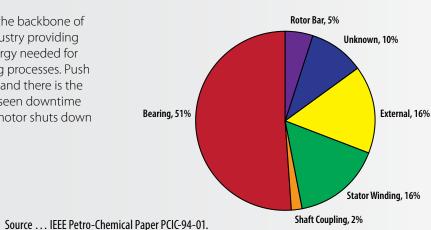

The Allen-Bradley® line of motor protection devices encompasses a range of simple, single purpose protection to the newer overload technologies featuring diagnostics and Logix integration.

Importance of Motor Protection

Electric motors are the backbone of today's modern industry providing the mechanical energy needed for most manufacturing processes. Push too hard, too often, and there is the potential for unforeseen downtime while the affected motor shuts down and awaits reset.

Causes of Motor Failures

75% of motor failures can be prevented by appropriate protection measures

E1 Plus™ Electronic **Overload Relay**

Key Features:

- Current measurement-based protection
- Low energy consumption
- Side-mount expansion modules provide adjustable levels of protection and communication

E300™ Electronic **Overload Relay**

Key Features:

- Provides critical motor protection functions
- Communication and diagnostics provides detailed logs and control from relay to motor
- Can simplify control architecture

MachineAlert™ **Monitoring Relays**

Key Features:

- Programmable latching or inhibit at set level
- Adjustable time delay settings
- Three-phase devices are powered by the measuring circuit
- Adjustable measurement set points

Bimetallic **Overload Relays**

- Rated for DC and variable frequency drives applications up to 400 Hz
- reset accessories

857 Motor/Feeder **Protection Relay**

Key Features:

- Ambient temperature compensation for consistency
- Optional remote reset solenoid and external

Key Features:

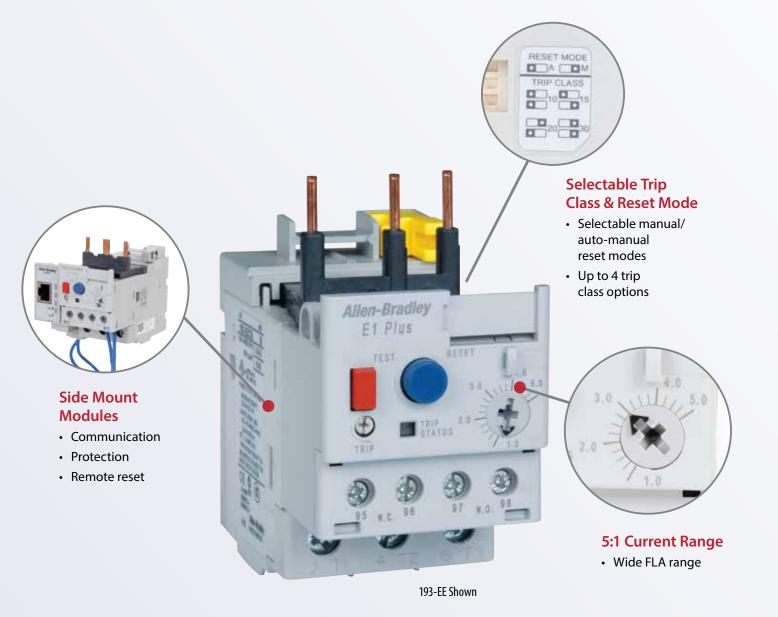

- Suitable for any system voltage to 450,000V
- Configurable interlocking schemes offering basic logic functions
- All settings, events, and indications are in a non-volatile memory

E1 Plus™ Electronic Overload Relay

The solid-state design of the E1 Plus overload relay, offered in two models, provides ambient temperature compensation, thermal and phase loss protection and a wide 5:1 adjustment range. The ED model provides fixed protection while the EE model provides selectable and expandable protection.

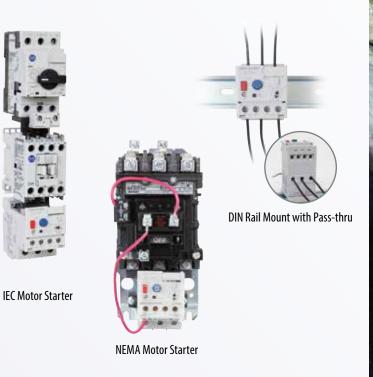

Model Specifications

Bulletin 193, ED Model			
Current Range	0.145 A		
Trip Class	10 Fixed		
Reset Mode	Manual Only		
Side Mount Modules	_		

Bulletin 193/592, EE Model				
	Current Range	0.1800 A		
	Trip Class	10, 15, 20, 30 Adjustable		
	Reset Mode	Automatic and Manual		
	Side Mount Modules	Communication, Protection, Reset		

Mounting Options

Diagnostics

The E1 Plus communication side-mount modules provide a cost-effective transformation of real-time data into your control architecture.

- DeviceNet
- · EtherNet/IP
- PROFIBUS

Advantages

- Includes integrated I/O
- Provides convenient local termination of motor-related inputs (2) and outputs (1), simplifying the control architecture
- · Provides operational and diagnostic data
- Average motor current
- Percentage of thermal capacity usage
- Device status
- Trip and warning identification
- Trip history (5 previous trips)
- · Expands protective functions
- Overload warning
- Jam protection
- Underload warning

Customizable

The optional side mount modules* for the E1 Plus overload relays allow you to customize the device to your application's specific needs.

* Side mount modules only available for EE model

Communication Modules

- EtherNet/IP
- DeviceNet
- ProfiBus

Protection Modules

- Ground fault
- Jam protection
- Ground fault/ jam protection
- PTC module

Reset Modules

- Remote reset
- · Remote indicator

E300™ Electronic Overload Relay

Removable

Terminal Blocks

The E300 Electronic Overload Relay provides a flexible design and advanced intelligence. Real-time diagnostics are transformed into actionable information – maximizing your up-time and protecting your assets.

Expansion Port

Operator station

• Expansion I/O

Module Specifications

Communication Module 193-ECM* Features • EtherNet/IP DeviceNet

Control Module					
193-EIO*	Control Voltage	1/0		I/O and Protection†	
	Control voltage	Inputs	Relay Outputs	Inputs	Relay Outputs
	110120V AC 50/60 Hz	4	4	2	2
	220240V AC 50/60 Hz	4	3	2	2
	24V DC	6	3	4	2

Sensing Module				
592/193-ESM*	Sensing Options:	Current Range:		
	Voltage/Current/Ground Fault	• 0.530 A		
	• Current/Ground Fault	• 660 A		
	• Current	• 10100 A		
		• 20200 A		

Mounting Options

DIN Rail Mount Motor Starter

IEC Motor Starter

Diagnostics

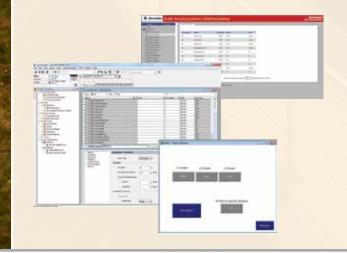

The E300 overload relay provides real-time motor diagnostic information to proactively indicate when a motor is having a problem allowing you to efficiently troubleshoot. This information includes:

- Current
- · Ground fault current
- Voltage
- Power
- Energy

- · % Thermal capacity utilization
- Time to trip
- · Time to reset
- Trip history
- Trip snapshot

The communication options of the E300 overload relay allow users to view this diagnostic information using the following methods:

- · Logix add-on profile
- · Web browser
- FactoryTalk® View
- Faceplates

Customizable

Multiple accessory options allow for the E300 overload relay to be customized to fit your application needs. Customers can expand out to 4 of the available Digital I/O modules, plus 4 Analog I/O modules along with a power supply and operator interface.

Expansion Digital I/O

- 4 inputs/ 2 outputs
- 24V DC
- 120V AC
- 240V AC

Expansion Analog I/O

- 3 universal inputs/ 1 output
- 4 20 mA
- 0 10V
- RTD
- NTC

Expansion **Power Supply**

- 120/240V AC
- 24V DC

22 mm push button cutout

MachineAlert™ Monitoring Relays

The MachineAlert family of dedicated function motor protection relays offers supplementary protective functions that are easily added to your motor control circuits.

Bimetallic Overload Relays

The bimetallic thermal overload relays compensate for ambient temperature while providing overload protection and phase-loss sensitivity. They are a cost cost-effective ways to protect your electrical equipment investment.

193-T Bimetallic

The 193-T bimetallic overload relays are designed for use with the 100-C contactors and 104-C reversing contactors

193-K Bimetallic

The 193-K bimetallic overload relays are designed for use with the 100-K miniature contactors and 104-K miniature reversing contactors

Offers basic motor protection at an economic price

Ideal Applications

- Protects against single phasing during start-up and run-time in motor applications
- Detects incorrect phase sequence to keep the motor from starting
- Detects no-load conditions indicating absence of water in water lubricated pumps
- Protects motors from over temperature conditions

Ideal Applications

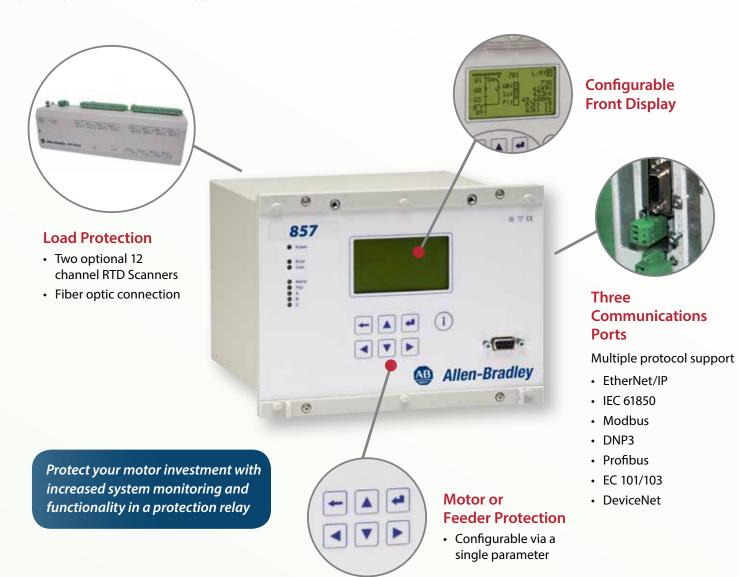

Ideal for light industry and low critical process

- Conveyors
- Fans
- Pumps
- VFD-controlled motors
- DC motors

8

857 Motor/Feeder Protection Relay

The 857 medium/high-voltage motor and feeder protection relay contains the essential protection functions needed to protect feeders, and motors in distribution networks of utilities, heavy industries, power plants and offshore applications.

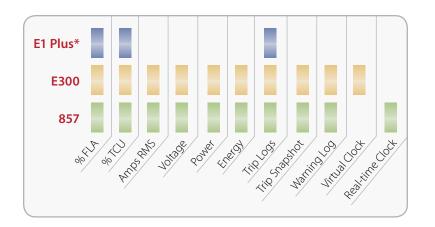

Functions

This device also includes many programmable functions for various protection and communication situations:

- Ultra-fast arc protection (optional)
- Power quality assessment
- Trip circuit supervision
- Circuit breaker protection
- · Complete protection and control

Product Selection Attributes

Diagnostics

Usability

Bimetallic

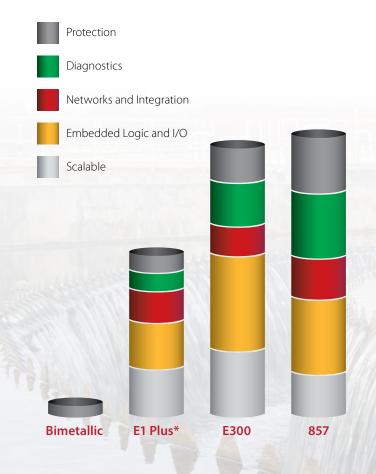

- Selectable reset mode
- Built-in test/reset button
- Manual trip

E1 Plus*

- Multiple trip class options
- · Selectable reset modes
- · Wide current range
- Additional modules for communications and protection

Performance

E300

- Advanced performance and diagnostics
- Embedded communications
- Modularity
- Multiple expansion options

BEST

857

- Highly configurable
- Motor and feeder protection in one unit
- Multiple communication interfaces and protocols
- Extensive diagnostic capabilities
- Suitable for all system voltages to 450,000V

Prevent motor failures, protect your investments
